

Federico Della Croce holds a MS in Computer Science and Automation (1990) and a PhD in Operations Research (1993) from Politecnico di Torino, Italy. Since 2011, he is Full Professor of Operations Research at Politecnico di Torino where he served as Head of the Department of Control and Computer Engineering from 2012 to 2015 and as Vice-Head of the Department of Management and Production Engineering from 2018 to 2019. His main research interests concern exact, heuristic and approximation algorithms for combinatorial optimization problems, with emphasis on graphs and scheduling problems. He has published more than 90 papers on international journals such as COR, DAM, EJOR, IJOC, JOS, MathProg, OpRes and TCS among others. He is member of the Editorial Board of COR and EJOR.
